September 19, 2019

Vita Health and Wellness

Vita Core Components

Vita means Life

- Health & Wellness in the Community
- Healthy Eating: Urban Agriculture and Nutrition
- Housing Opportunities: Quality, Affordable Housing
- Active Living: Safe Places to Walk and Play
- Promoting Good Jobs and Local Businesses
- Hospital and Community Connections

Social-Economic Factors

WEST SIDE NEIGHBORHOOD, STAMFORD

38%
Undocumented

37% Poor English Skills

31% < High School Degree

Median household income \$36,000 - \$45,000

20% living in poverty

Health Disparities in the Vita District

- Higher rates of Chronic Disease and Associated Risk Factors:
 - Asthma
 - Diabetes
 - Overweight / Obesity
 - Hypertension / High Blood Pressure
 - High Cholesterol
- High rates of residents reporting No Physical Activity
- Higher percentage of population reporting fair / poor physical and mental health.

SOCIAL CAUSES OF HEALTH

- *When it comes to population health status, “Your Zip Code is more important than your Genetic Code!”*

Social Causes of Health

Socio-Economic Factors

Access to Health Services

Physical Conditions

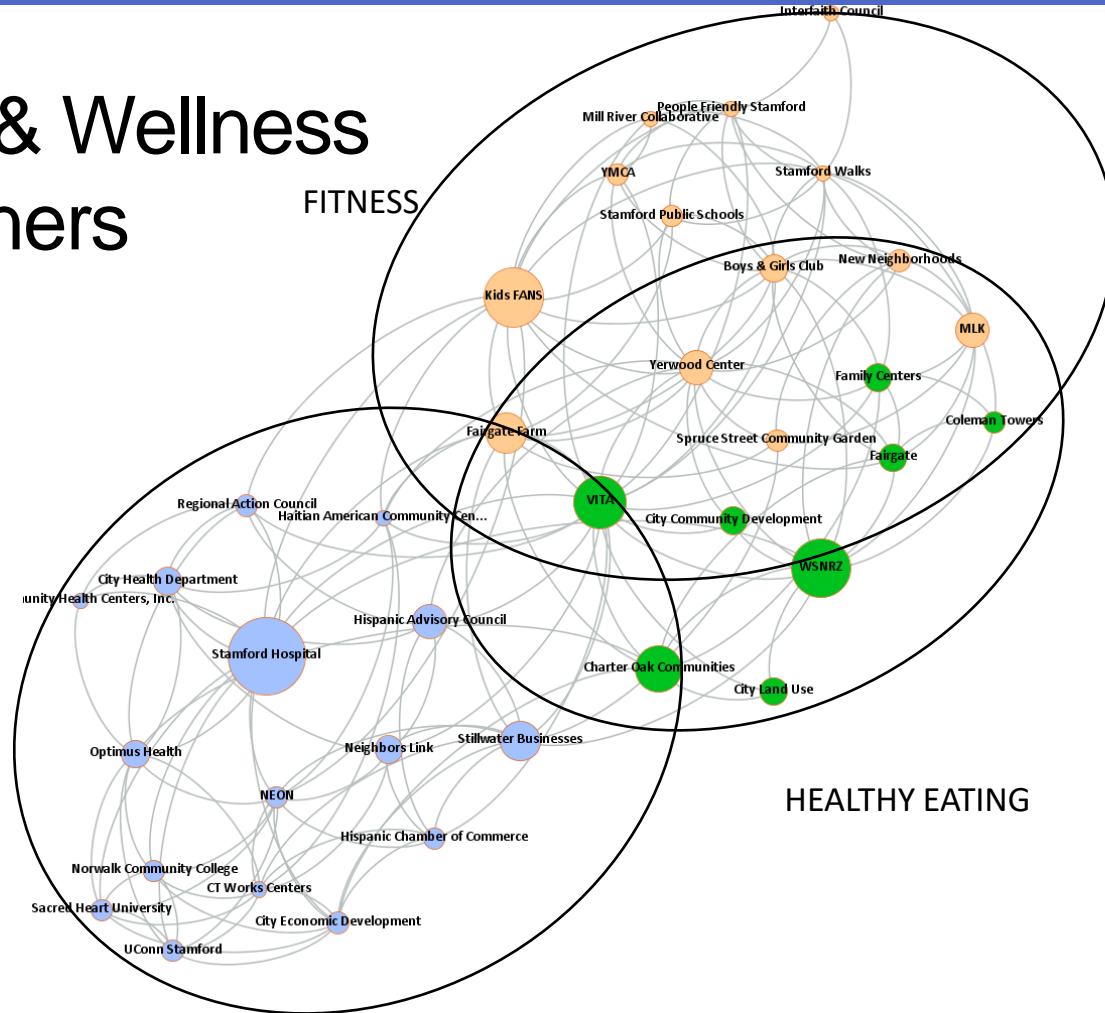

Individual Behaviors

Vita Health & Wellness Partners

HEALTH CARE AND
WORKFORCE

FITNESS

HEALTHY EATING

Outcomes: Improved Livability & New Hospital Facility

- **Quality of Life:** Public-private investment in walk-able neighborhood, aligned with improvement in parks and public facilities; Reduction in crime and nuisance conditions
- **Hospital Replacement:** New \$500M *state of the art* hospital with improved physical connections to the community

New Housing & Economic Development

- **Housing:** Created 550 units of attractive, mixed-income, healthy housing with on-site support services
- **Business Development:** Attracted new businesses and activated WSNRZ Merchants Association

Healthy Nutrition & Community Building

- **Access to Healthy Food:** Established Fairgate Farm, volunteer-powered working farm and nutrition education center, supported by programs, volunteerism, market and cooking classes
- **Obesity Prevention:** Kids' Fitness & Nutrition Services (KidsFANS), a community-wide taskforce for the prevention of childhood obesity has served thousands of children

Investing in Housing and Community Health

What We Do

CSH is a touchstone for new ideas and best practices, a collaborative and pragmatic community partner, and an influential advocate for supportive housing.

Shift in Focus: From Patient Outcomes to Community Outcomes

- Focus on Population Health is Driving a Realignment of the Traditional Hospital Business Model
 - *The Triple Aim*
 - *Hospital Community Benefit Requirements*
- New Value-based/ Value-oriented Payment Models Incentivize for Improved Health
 - *ACOs, DSRIP, PCMH, Medicaid Health Homes*

Housing As a Powerful Social Determinant of Health

Social determinants of health are the...

“...circumstances in which people are born, grow up, live, work and age, and the systems put in place to deal with illness. These circumstances are in turn shaped by a wider set of forces: economics, social policies, and politics.”

- World Health Organization

**Homelessness/
Housing

Supportive Housing: A Powerful Social Determinant

Supportive housing combines affordable housing with services that help people who face the most complex challenges to live with stability, autonomy and dignity.

High Quality Supportive Housing

A variety of housing models exist with common factors including:

Located in within safe neighborhoods with close proximity to:

- **Transportation**
- **Employment opportunities**
- **Services**
- **shopping, recreation and socialization.**

Tenants *have a lease identical to those of tenants who are not in supportive housing.*

Services are voluntary and consumer-driven. They focus on ensuring that tenants can obtain and thrive in stable housing, regardless of barriers they may face.

The housing and its tenants are good neighbors, contributing to meeting community needs and goals whenever possible.

Supportive Housing is the Solution

- 80% of supportive housing tenants are able to maintain housing for at least a year
- Use of the most costly (and restrictive) services in homeless, health care and criminal justice systems declines when living in supportive housing
- Supportive housing tenants choose to participate in services even when they are not a requirement for tenancy

Current Housing Paradigm

- Shortage of affordable housing supply
 - Only 1 in 4 eligible households obtain rental assistance
- Housing is not an entitlement
- What the market is currently building: less than 1% affordable
- Needs of the very low-income and highly vulnerable population are not being met

Emerging Trends in Health System Investments Types

Not A One-Size-Fits-All Approach

Health Systems are exploring the myriad of ways they can address social determinants like housing:

- Hospital Community Benefit
- Donating Underutilized Hospital Land
- Financial Investment/ Donation
- Leveraging LIHTC/ Federal, State & Local Resources
- Respite

Financial Investment Ex: Florida's Housing the 1st 100

Housing the First 100: Orlando, FL

Left: HCCH outreach staff and Jane Ann in the woods where she lived.
Center: HCCH Housing the First 100 staff and health center leadership show their commitment to the program.
Top Right: Jona in her new home. She previously lived under a bridge for 2 years.

- **What?** – Collaborative that connects high cost, high need, homeless frequent users of multiple systems (homeless, hospital and jail) to housing and services.
- **Who?** – Partnership between Orange Blossom Family Health; Florida Hospital, CoC, law enforcement, and local government
- **How?** – Public outcry over street homelessness; Hospital system spending 3X the cost of housing on preventable services. FL hospital invested \$6M for 3 yrs of services, City of Orlando provided \$4M to fund Barrier Busting Fund and HF pilot. County and HUD funds used for rental assistance.
- **Outcome** – 168 people housed. ↓ in incarcerations and hospitalizations, ↑ in individual income and housing retention.
- **Moral of Story** – Hospital looked at its own data to see cost of serving homeless; cross-sector collaboration and multiple funding sources

HOUSING IS HEALTH COLLABORATIVE

Portland health care organizations are investing \$21,500,000 allowing CCC to build 382 new housing units across three locations and a new health center in Southeast Portland. The health organizations supporting the initiative are: **Adventist Health Portland, CareOregon, Kaiser Permanente Northwest, Legacy Health, OHSU, Providence Health & Services – Oregon**

Housing +
Health Care for
the Whole
Person

CENTRAL CITY
CONCERN

HOUSES • HEALTH • JOBS

Housing is Health Initiative Sites

Charlotte B Rutherford Apts

- 6905 N Interstate Ave
- 51 units of housing affordable for families earning 30% to 60% MFI
- Preference for displaced households who wish to return to the community

Hazel Heights Apts

- SE 126th and Stark St
- 153 units of permanent housing for people exiting transitional programs

The Blackburn Health & Recovery Ctr

- 175 affordable apartments for people with special needs:
- 51 beds providing medical & MH respite care
- 10 units of palliative care
- 114 units providing recovery housing

Information originally presented by Rachel Solotaroff, MD, Medical Director, Central City Concern at the ACHI Conference March 2018

• 40,000 square foot health clinic

Funding Sources for Housing Is Health

Information originally presented by Rachel Solotaroff, MD, Medical Director, Central City Concern at the ACHI Conference March 2018

CAMBA Gardens I & II

- A 2005 CSH White Paper influenced the decision on how to re-use surplus hospital land
- Model partnership between a public hospital, non-profit developer service provide and community stakeholders
- Phase I and II opened in 2013 and 2016 respectively on the campus of NYC Health + Hospitals' Kings County Hospital
- Provides a combined 502 affordable and supportive homes in the heart of Brooklyn, NY.
- Represents over \$166 million in public/private investment.

CAMBA Gardens Amenities

On site social services provided by CAMBA, including:

- Job training, Resume workshops, Healthy living workshops, - Assistance with accessing benefits, - Referrals to community based resources, including preventative healthcare at Kings County Hospital

24/7 front desk security

Computer rooms available for resume workshops, job searching, and computer skills trainings

Community rooms and multi-purpose rooms available for community and tenant meetings and workshops

Outdoor landscaped areas with seating and play areas for families

Community planting beds for tenant community garden programs

Teaching kitchen for healthy living and cooking classes integrated

CAMBA Gardens Unit

Teaching Kitchen

Funding Sources for CAMBA Gardens

CAMBA Gardens Project Financing

- Total Development Costs: \$66,892,558
- Capitalized Lease Payment to HHC/KCHC: \$2,300,000
 - Payment made at construction closing on June 30, 2011
- Construction Financing Sources:
 - New York State HFA Tax Exempt Bonds
 - Credit Enhancement provided by TD Bank
 - Federal Low Income Housing Tax Credit Financing
 - Syndicated by Enterprise Community Investment
 - NYC HPD Supportive Housing Loan Program
 - NYS Homeless Housing Assistance Corporation
 - Brooklyn Borough President Marty Markowitz
 - NYC Councilmember Mathieu Eugene
 - Federal Home Loan Bank of New York with HSBC
 - NYSERDA
- Social Service Funding Sources:
 - NYC Department of Health and Mental Hygiene
 - NYC York City Department of Homeless Services
- Operating Funding Sources:
 - 125 Federal HUD Section 8 Vouchers Provide by HPD
- Predevelopment Financing Provided by Corporation for Supportive Housing and Enterprise Community Investment

Completed building at 738 Albany Avenue (Winter, 2014)

738 Albany rear yard with play equipment and passive seating areas (Winter, 2014)

NYC's St. Barnabas' Community Wellness Project

Project Summary

Medical Facility

- 8,000 SF Urgent Care
- 22,000 SF Mind Body Center

Population Health Space

- 13,000 SF Women and Children's Centers
- 6,000 SF Nutrition/WIC Programs

Affordable Housing

- 50 MRT Units
- 45 Working Homeless Units
- 219 Affordable Units

Commercial Space

- Extended Hour Daycare
- Local Pharmacy
- Healthy Food Cafe

Emerging Work:

Leveraging State Resources Ex: NJ Hospital Partnership Subsidy Pilot Program

- **What?** – NJHMFA to provide up to \$12M in matching funds from 3-4 hospitals to develop AH and SH for special needs residents and/or frequent users of hospital ED. The project financing includes 4% LIHTC.
- **Who?** – NJHMFA, NJHA and up to 4 acute care hospital systems
- **How?** – NJHA President and HMFA ED were spurred by the Camden Coalition of Healthcare Providers “hot-spotting” efforts
- **Outcome** – TBD. LOI due 12/17/18
- **Moral of Story** – Emerging trends in health bring about unique partnerships to incentivize hospital investments

Medical Respite Care:

A Caring Place to Recover
from Illness and Injury for
People Experiencing Homelessness

Yale
NewHaven
Health

the way home
COLUMBUS
HOUSE INC

Who Needs Medical Respite?

Patients who:

- Are discharged from the acute care provided by the hospital, but
- Lack housing in which to continue their recuperation, and
- Will benefit from professional nursing care to continue healing

Common Medical Conditions in Respite Referrals

- Post-surgery **wound care**
- Treatment of **Infections**
- **Respiratory** ailments
 - Pneumonia, COPD or asthma
- Bone **fractures**
- Temporary **med management** (antibiotics)

What are the Goals of Respite?

- Provide the location, supplies, and medical care that homeless patients require to recover
- Reduced length of stay, re-visits to the ED, and readmissions
- Reduced costs to the hospital and payers
- End the cycle between homelessness and hospitalization

Pre-2013: Culture of Medical Care

- Customize the treatments to the diagnosis, but otherwise consider every patient the same:
“Why don’t homeless patients just take their medications and keep their appointments?”
- If lack of housing is disclosed, consult the social worker to assess and refer to services.
- No standardized method of patient interview, documentation of housing status, or collaboration among care- or community-providers

Pre-2013: Waking up to Homelessness

Some of us recognized that many homeless individuals were coming to YNHH with complex medical and social needs

We suspected they were receiving a disproportionate amount of Medicaid and hospital resources:

- A higher level of care for more days, with
- More readmissions, and
- Many more Emergency Department revisits

But without data, how bad was it?

Homelessness and Hospital Care...

Kelly Doran, MD – RWJ Scholar – 2012

Studied 113 homeless individuals during the 30 day period following hospitalizations

70.3% returned to the ED during that time

50.8% were readmitted to inpatient care

3.0% were readmitted for Observation

75% of these readmissions occurred **within 2 weeks**

Only 18.7% of Adult Medicaid patients were readmitted during this time

From Academics to Advocacy...

- A Task Force was formed with YNHH and Columbus House participants advocating to the Connecticut legislature for a Medical Respite program
- Former shelter director, then Senator Toni Harp of New Haven championed the bill
- With the assistance of our New Haven delegation to the CT Legislature, funds for Medical Respite have been included in each budget signed by Governors since July of 2013

Respite Design Issues

- Hospital referral required? ED? Clinic?
- What staffing is needed? Training? Accountability?
- Who will screen/approve patients, using what criteria?
- Will patients have visitors or leaves during their stay?
- Is substance use permitted? Before/During?
- What services will be provided during their stay?
 - Housing case management? Transportation? Supervision?
- When is a patient discharged? Medically/Behaviorally?
- How will success be measured?

Age & Gender

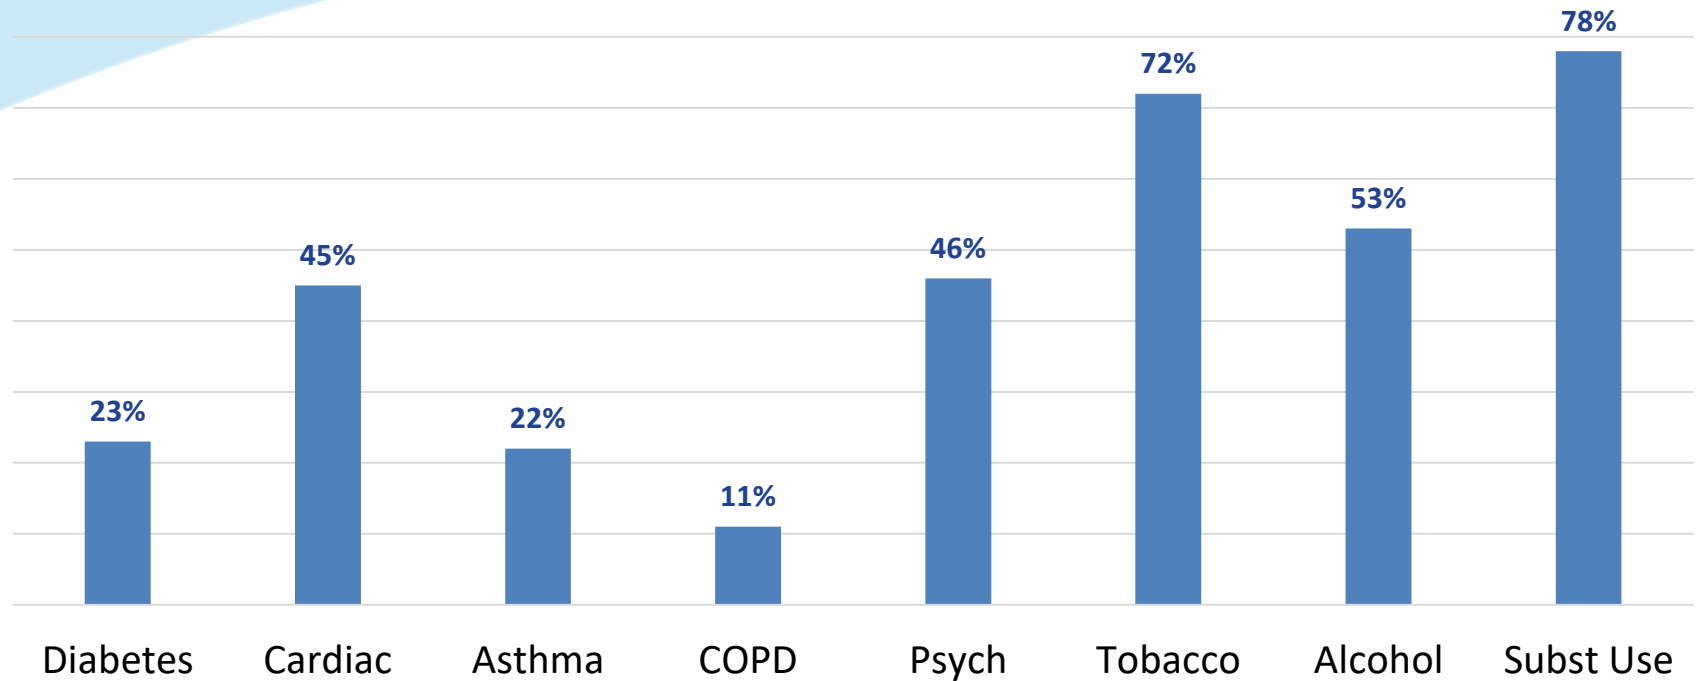

Gender distribution by age

Mental Health & Substance Use

	No Psych	Psych	Total
Clean & Sober	16%	5%	21%
Alcohol and/or Drugs	36%	43%	79%
Total	52%	48%	100%

Above-Average Prevalence of Chronic Illness Among Homeless Inpatients

- Review of 1127 unique patients identified as homeless from 2014-2019
- These 1,127 individuals were associated with 2,335 inpatient visits.

Staffing

At the Hospital

- Admissions
- MDs and RNs
- Social workers
- Care managers
- Data collection
& analysis

All covered by the hospital

At Columbus House

- Shelter manager
- Respite case manager
- Transportation
- 24hr Residential staff
- On-site nurses*
- APRN 20hrs per week*

**Covered by the hospital*

Communicating Housing Status through Social Work Narratives

The screenshot displays a software interface for social work documentation. The top navigation bar includes icons for navigation and a title bar with the text "3/4/2016 visit with LCSW for Social Work". Below the title bar is a menu bar with options: Images, Admin, Benefits Inquiry, References, Scans, Dictations, Care Teams, Print AVS, Preview AVS, and More. A left sidebar contains a list of navigation options: Snapshot, Chart Review, Care Everywhere..., Review Flows..., Results Review, Allergies, History, Problem List, Demographics, Letters, Identity Manager, Education, Order Entry, PreEpicEMR, and FYI. The main content area is titled "Narrative/Signoff" and features a "New Reading" button. Below this is a date and time stamp: "03/08/16 1204". The "Narrative/Signoff" section is divided into two columns. The left column lists categories: Identified, Clinical/Disposition, Issues/Barriers, Intervention(s)/Summary, and FYI. The right column contains the narrative text. The text describes a visit with a patient who was engaged and in positive spirits. It mentions that the patient shared openly about conflicts with his family that led to his moving out into a homeless shelter. The patient described his sister as critical and unsupportive. He denied that his new relationship was related to the conflicts he is having. His girlfriend simultaneously indicated that his family does not accept their relationship. The social worker explored his housing options, and the patient refuses to consider making amends with his family.

Asking about Housing Status in a Manner that Preserves **Dignity**

“Where have you been **living during the past two months**?”

“Is this **reliable housing** that you own, rent, or stay in as part of a household?”

“Are you **able to return** and stay there following discharge?”

- If yes, “Are you able to **receive a visiting nurse** there?”
- If no, will this patient have a **post-discharge medical need** requiring respite?

Medications (Apothecary)

- **Deliver medications**
 - prescribed & over the counter
- **Efficiently resolve med issues**
 - single source
- **Comprehensive review** of meds
 - possible drug interactions
- Waive charges to the **uninsured** & **underinsured**
 - And resolve billing issues

Patient Navigation in Support of the Medical Plan

- Assist patients with connecting to, and keeping appointments with:
 - Primary care
 - Mental health treatment
 - Substance abuse treatment
- Provide oversight and encouragement to adhere to medical & dietary recommendations
- Share observations and concerns with medical staff

Case Management

- Create housing service plan
- Benefit applications
 - Social Security, Food Stamps, SAGA, etc
- Refer to employment specialist
- Housing applications and move-ins
- Support in addressing court/probation matters
- Transportation

Ongoing Review & Coordination of Care

- **Weekly Case Review** meetings
 - Yale New Haven Hospital
 - Social workers, care managers
 - Columbus House Medical Respite staff
 - APRN and nursing
 - Apothecary staff
 - Primary Care Clinics
 - including Cornell Scott-Hill Health Center

What Are the Results?

Patients Served

Fiscal Year	Homeless Admissions	Unique Patients (by MR#)	Respite Applicants	Respite Patients
2014	803	427	104	53
2015	693	406	100	64
2016	731	461	98	89
2017	638	415	81	72
2018	757	480	96	73
Five-Year Total	3,622	1,270*	479	351

*unique patients over 5 year period

2017 Reduced ED/Observation Re-Visits

Data Source: YNHH 2017 inpatient, ED and Observation visits

Reduced Hospital Length of Stay

Average LOS reduction from 10.6 days in FY 2015 to 7.1 days in FY 2016 was associated with a \$300,000 reduction in Direct Cost for the care of these patients.

When Patients Have Housing...

- **Medical Respite:** the Medicaid-covered, per-person cost of care is *reduced* by between \$12,000 and \$25,000 in the following 12 months
- **Permanent Housing:** On average, each time the CAN houses a person experiencing homelessness, their likelihood of hospital readmission drops by half.
- **Housing saves healthcare dollars:**
 - Prevents people from needing care in the first place
 - Avoids recurrence of illness & injury during recovery

Reasons for Success

- Housing *is* Health Care
- Advocacy & Innovation
- Increased commitment to staffing and resources
- Increased collaboration & training
- Improved care
- Faster, more efficient processes
- Intensive case management
